

INTEGRATING THE HEALTHCARE ENTERPRISE INTEGRATION STATEMENT

CAPSULE ALARM SURVEILLANCE (FORMERLY BERNOULLI ALARM SURVEILLANCE)

Overview

This Integrating the Healthcare Enterprise (IHE) Integration Statement describes the intended conformance of the Capsule product with the IHE Technical Framework. The product implements all transactions required in the IHE Technical Framework to support the IHE Integration and Content Profiles, Actors and Options listed below.

This IHE Integration Statement does not guarantee successful interoperability of the Capsule product with products from other vendors. To ensure safe and effective operation of connected, interoperable products, users of the Capsule product are responsible for testing and validating the full range of product interactions supported by the implemented integration. Testing and validation are strongly recommended by Capsule and other vendors of IHE conforming products, before interoperable products are used clinically.

Capsule accepts that the IHE Technical Framework and the underlying communication standards will evolve and that some advancements will require changes to already installed systems. The company is committed to modifying and adapting its products to maintain conformance to meet market conditions and user requirements.
